events may fully justify its existence. The value of the bullion dispatched during the past week by Wells, Fargo & Co. is \$65,414.21.

regard to the immediate future of our

mines is much more hopeful than it has

been for some weeks, though perhaps

it would be difficult to point out any

very certain ground upon which to build

expectations for a marked improvement

in prospects. Anyway, the impression

is abroad, and we sincerely hope that

RAYMOND AND ELY. The cross-cut being driven for the vein from the 1200-foot station, has now attained a length of 185 feet. It is now in a formation which very clearly indicates that the drift is in the immediate vicinty of the ledge. The country rock quartzite) looks what miners term 'lively'' and of a character favorable to the existence of a metal bearing vein. The drift is being pushed forward as rapidly as possible, and is not at all improbthat either to-day or to-morrow news will be sent to the trustees that the vein has been cut. What its character when opened, as no one can see into or through a mill-stone or solid quartzite, it is impossible to tell, and therefore speculations are useless. We can only hope that the ledge will be large and rich. If it is, Pioche for some time to ome, may bid adieu to duli times. In the tenth or 1000-foot level on the western side, a ledge of considerable wealth is revealed, but the ore taken out so far and shipped to the mills. The other departments of the mine call for little no. tice, as everything is proceeding in the ordinary channels. The 30 stamp mill s crushing ore with 20 stamps, and part of its pans are working tailing mill No. 1 is entirely engaged. The yield or the five days last week was fair, being something over \$15,000 for five days run. The Raymond & Ely tailings seem a mins of weath that is almost inexhaustible. With respect to the crection of pumping machinery, we understand that inquiries are being made as to the feasibility of psires. using compressed air as a If this is practicable, the ex pense of setting up and working the pumping gear would be very materially reduced. We are informed that a deep coal mine in Pennsylvania is being kept clear of water by this recently utilized clear of water by this recently utilized motor, and that there the system works admirably. This, of course, is merely on dit, and until satisfactory evidence is offered, we do not suppose that the trustees of the company would attempt to use this new mode of driving machinery. One thing, however, is very certain, that if either the Raymond & Ely or the

amount to no inconsiderable quantity. MEADOW VALLEY. No. 3 shaft—No effort was made during last week to resume sinking on this the last week to resume sinking on this shaft, as it is now conceded that it as well as the Raymond & Ely has reached the water level of this region. The cross cut from the lowest station; that is being driven towards the ledge, is now 27 feet in length, and has probably about 27 feet more to be opened before it will intersect the ledge. On the eleventh level, the western drift is in 24 and the eastern 168 feet. the western drift is in 24 and the ena-ern 168 feet. The appearance of both faces are about the same as last reported, quite a strong ledge, but containing little ore. On the 9th level, on the western side, stoping is being continued, working upwards towards the eighth and seventh appears towards the eighth and seventh, as also on the 520-foot level, eastern side. The eastern drift of the ninth has been opened a length of 783 feet, and is now probably farther east than No. 5 or Sum-nit show.

Last week these works were shut down for a few days in order to put in a new rest center and flanges, and to splice the cable. Work is now resumed, and the shaft is steadily progressing; it is at present 1044 feet deep. The drift that is being opened to connect with the ninth level of No. 3 is about 15 feet in length, with about 60 feet to run to make the connection. There is but little difference to report in other matters. The NO. 5 OR SUMMIT SHAFT.

the connection. There is but little difference to report in other matters. The mill is kept steadily running on ore and tailings, with fair returns; and with no changes worthy of causing a remark.

Last week this mine sent something over a hundred tous of ore to be worked by the Floral mill. The returns so far promise to be very favorable, and the mill people are doing their best to secure a favorable yield. At the mine, the Margens shaft is now within about fifteen feet of the middle level, and is being pushed as rapidly as possible. It is supposed that a connection will be made with the lower level about the 20th of June text. On this—the lower level—a drift or cross cut is being run easterly to

connect with the shaft when it reaches connect with the shall when it reaches that depth. The only other work that is being prosecuted is sinking the winze from the lower level. It is now about 50 feet in depth, and the face shows many streaks of ore, some of it very rich.

PIOCHE. Since our last, the work of sinking the new shaft has for the present been dis-continued. The cross-cut that is being opened towards the ledge is 28½ feet in leastly. The moves level to connect with length. The upper level to connect with the old works has reached 260 feet in ength, and about fifteen feet additio Fly, though the other prises of this region have to some extent connection. Some considerable quantity of ore is being taken out of the old sheds a brighter light on the events of works by parties working on shares. By works by parties working on shares. By careful sorting some very rich ore is ob-tained, which yields quite satisfactory returns when milled. Mr. Butler, the termination of operations in Highland
District. The latter seems to have been brought about by a lack of precaution in good results.

NEWARE.

on the exploitation of the company's mines until they became self-sustaining or their owners were satisfied that the mines would not prove remunerative. It certainly showed as ad want of knowledge of the true nature of such undertakings, for a company to employ several score of the company to employ several score of the such as the company to employ several score of the true nature of such undertakings, for a company to employ several score of the true nature of the company to employ several score of the company to employ several score of the such that the such contract has been let to a responsible party to sink the old Amador shaft an additional five hundred feet, and the work will be proceeded with without delay. The new portion of the shaft has been completed an additional five hundred feet, and the work will be proceeded with without delay. The new portion of the shaft will be placed to a depth of some 500 feet is 4x6. After the shaft has been completed an additional five hundred feet, and the work will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with without delay. The new portion of the shaft will be proceeded with the work will be proceeded with a shaft will be proceeded with the work will be proceeded with the work will be proceeded with a shaft will be proceeded with the work will be proceeded with the work w men and put them to work amout first the new hoisting works will be placed having sufficient funds on hand to defray over it. The work in the mine is prohaving sufficient funds on hand to defray all expenses, independent of whatever returns might be derived from working ore. However, we understand that matters are in course of satisfactory settlement for the time being, so we will amount of \$3,300. amount of \$3,300.

AMERICAN PLAG. Matters in this mine are in a very healthy condition. The shaft is being sunk as quickly as convenient. The lower levels are also being opened as rapidly as possible. The faces show fairly. In the upper levels stoping is being continued, and from the mine generally about twelve or thirteen tons of milling ore is being extracted daily. The milling ore is being extracted daily. The mill is kept constantly at work on the company's rock, and the returns are quite satisfactory. Mr. James is inde-fatigable in his efforts to manage the business of the mine and mill in as effective and economical a manner as possible, and we think is quite successful in doing so.

DESDRMONA

Has not been heard from for some time A short time since two practical and in-dustrious men, Messrs. Bull & Leavitt, leased this mine for six months, and have taken out some ore that has re-munerated them very handsomely for their labor. They sent nine tons of se-lected ore to the Newark, formerly the Amador Mill, and a return was made of \$700, which shows that our mines will yet richly remunerate the faithful laborer. Messrs. Bull & Leavitt continue steadily at work and will soon have another lot of ore ready for the mill, which we hope will pay them equally as well as the first.

PORTLAND.

But little new to report from this mine. On the lower level drifting is going both on the eastern and westerly sides. The face in the latter looks very well, that on the eastern side is not quite so favora-ble. On the upper level the drifts are being opened in the same direction, and some stoping is being carried on. The some stoping is being carried on. The returns from the last crushing were sat-isfactory, and generally the prospects of the mine are flattering.

CHIEF OF THE HILL.

The appearance of the drifts in this The appearance of the drifts in this mine indicate some slight improvement. The streaks of pay ore are more frequent and of a better quality, and it is thought a more settled and valuable portion of the ledge is about being opened. In other respects the mine offers but little for remark. In the upper level the men are still at work extracting ore on shares, and both the company and the workmen appear likely to profit by the arrangement.

HAYANA.

HAVANA.

The work of connecting the two shafts is almost completed, and when effected will thoroughly ventilate the mine. Dur-ing the past week sinking on the shaft has been continued. The ledge still has been of so low a grade that it would not pay for working at present rates at any rate. In the upper levels from the stopes a moderate quantity—say from 20 looks well, and affords considerable ore. PAGE AND PANACA.

Little is going on in this mine but drifting on the old level. The ledge in the face shows considerable ore. Sinking the winze has been discontinued.

The lower drift being driven towards the ledge is now 200 feet in length and is being steadily opened. No further change to remark.

FIGHTS .- We thought we were about to enjoy a couple of these pleasant pastimes (for the reporter) but ruthless fate in the person of Joe Hong heartlessly interfered with, and utterly destroyed one of these pleasing diversions; and as to the other-well it sort of stopped off itself. So there we were, after sharpening a pencil and securing a front seat on a neighboring porch, left to chew the cud neignoring porch, left to chew the cud of disappointment and meditate upon the uses of adversity, which some folks say are sweet, but we do not believe a word of any such nonsense. We think it is mighty hard, when items are so scarce as they are now, and a nice little row is being cooked up, that a meddle-some Deputy Sheriff should come pok-ing round and nip these little harmless amusements in the bud, and leave us without an item. We are disgusted. Meadow Valley companies wish to sink their shafts, machinery must be obtained to free the mine from water, which may

Schools.-F. Pierce is engaged in taking the scholastic census of this School District, and we hope the public will afford him the necessary information to enable him to make an accurate return. While we are on the subject of schools, it may not be amiss to remark that in the western portion of the State an effort is to be made to enforce the law which is to be made to enforce the law which requires all children of the proper age to be sent to school for a certain number of days in every month. The Gold Hill News says that is the best way of decreasing the large number of hoodlums that are infesting that town, and we don't know but what the News is right.

DISTRICT COURT.-The Court met yes erday at the usual hour, and the following business was transacted: Walter vs. Ward, continued to the 20th of July. The case of Dooley vs. Dooley, a suit for divorce, was tried by the Court, and a decree of divorce ordered to be entered on the ground of extreme cruelty and drunkeness. The care of the children, three in number, was awarded to the mother.

mother. Toano.-We had a long talk yesterday with our old time friend F. F. Marx, the

THE MATCH AT BULLIONVILLE. - In order to accommodate the folks who are desirous of witnessing the base ball match at Bultionville, the train will leave this morning at 9:30 and will arrive at Bulionville about 11 o'clock. It will return after the game is finished. We imagine that a goodly number of our citizens will wish to go down and see the Pioche Nine exert themselves for the the honor of the city of the hills and therefore event to see in the hills, and therefore expect to see a crowded train. Mr. Nesbitt will, as heretofore do his best to accommodate all

comers, and under his care all will go right, for he knows his business. ICE CREAM .- Under the head of "New To-Day" will be found the advertisement of Cason & Michel, the proprietors of the well-known Lafayette Restaurant, on Meadow Valley street. In addition to their regular business, they will send out fine pastry and ice cream to families who may desire those delicacies. The excellence of the Lafayette cusine is well-known to all and will be kent and well-known to all and will be kept up to the mark on all occasions

THE BALL given by Professor Bach on Friday evening last was a very elegant affair. It was attended by quite a number of our best citizens, and they all are united in saying that they enjoyed themunited in saying that they enjoyed their, selves greatly. The music was excellent, and the arrangements generally were very satisfactory. Unfortunately for us, we were not able to attend, but the next time the Professor gives one of these pleasant reunions, we hope to be on hand.

FRESH TROUT.-C. T. Emerson has on hand and for sale a ton of fine fresh trout packed in ice. The fish are in splendid condition, so epicures will have a chance to gratify their gastronomical tastes. Mr. E. has also not less than a chance to granty their gastronomical tastes. Mr. E. has also not less than 5,000 dozen of eggs packed in excellent shape. Restaurants, boarding-houses and families cannot do better than apply at one to the old stand, late Hosmer & Seffers, Main street.

A CHIMAMAN employed by O.A. F. Gilbert in the capacity of a book-keeper for the Chinese hired by him, was brutally beaten by some Indians near Genoa yesterday. It appears that the Chinaman in question had been to Genoa for the purpose of collecting some money, but had not been successful, and was returning to Carson on foot, when about a mile this side of Genoa, he was accosted by ing to Carson on foot, when about a mile this side of Genoa, he was accosted by two Indians, who asked him if he had any money. The Chinaman replied in the negative, when the Indians proceed-ed to go through him, and found two dollars. Chagrined at their ill luck, the Indians commenced beating the poor Celestial over the head with a bottle, and cerestrat over the head with a bottle, and left him to die in the road. Two white men came along shortly afterward and found the poor fellow lying on the ground in an insemble condition, with no less than six deep gashes on the head. some of which were an inch deep and two inches in width. They conveyed They conveyed him into town, and a Chinese doctor was sent for. At last accounts he was still alive, but it is doubtful if he ever recovers. The Indians have been arrested by the Genoa authorities.—[Carson Tribura 13] une, 12.

From a gentleman who arrived here From a gentleman who arrived here from Denver a few days since, we glean some facts relating to the San Juan mines, which attracted so much attention last Fall and Winter. He reports the immigration from the West as light, but says whole narrow-gauge loads of fortune seekers are pouring into Denver from Missouri and Arkansas. At the time of his departure, less than two weeks ago, the road from the foot-hills to the mines was impassable, and was to the mines was impassable, and was likely to remain so until June. Even then, it those on their way should get through, it would be extremely difficult to transport provisions. At Denver but little appeared to be known about the new camp, although rich specimens were on exhibition.—[Eureka Cupel, 13th.

A PARTY of gentlemen, consisting of C. C. Stevenson, R. M. Daggett, James Kelly, L. H. Torp and Mr. Garratt, passed through town to-day on their re-turn from the new coal mines in El Dodust, but in the best of spirits, owing to the fact that the coal mines looked even better than they had anticipated.—[G. H. News, 13th.

Last Monday evening a son of J. N. Pine, of Long Valley, while after his cows was attacked by a wild cat, which leaped on his horse while he was riding through the woods. His horse succeeded in shaking the intruder off and young Pine turned and drove the cat towards his father's house, where Mr. Pine met them and shot the cat. He weighed about twenty pounds.-[Reno Journal, 13.

CARMEN JULO, the woman shot and wounded by Edward Gagner, is now con-sidered as being quite out of danger, notwithstanding that the ball passed notwestanding that the ball passed entirely through her body. Gagner, who blew his brains out after making the attempt on the woman's life, now rests under the sod.—[Virginia Enterprise.

San Francisco, May 12, 1 p. m.—Mrs. Tracy, who was seriously injured by her husband on Sunday night, will recover. Peltram, the Frenchman who was stabbed during the affray on Sunday night, is very low and probably cannot recover.

All of the men who were injured at the time of the late accident in the Yel-low Jacket mine, are getting along finely.-[G. H. News, 13.

EARNESTLY

Do I CALL UPON THOSE STOCKHOLDERS in the Page & Panaca mise who are timidly watching the Bear movement to come forward and pay their quota of assessment. That the mine is all and more than its ardent friends and pay their quota or assessment. That the mine is all and more than its ardent friends claim for it requires no assurance on my part, and the present Directors are annious to have the assessments still due speedily settled, so as to convince those who are minimal to the interests of our mine that we not only mean business, but that we compare in integrity of purpose more favorably than the managers of any of the mines on our slope.

Thanking those who have so readily responded to my call, I feel coundent that those who are still lagging behind will not require another reminder to have them come up with their assessments, so as to save all extra expense and assure themselves of their legitimate investment.

PHILIP YALK, President. my12-2w To Let.
